Description:

EMBLEM WAPOC12 is a medium weight paper with a heavy matt Inkjet coating designed to be used on thermal and piezo plotters as well.

The paper offers a high presentation quality for inhouse posters and pre-press applications. It provides a high resolution, exact nuances of colours, convincing ink coverage and a very fast drying.

Before lamination the print has to be completely dry, otherwise there is the risk of lumps.

The use of high ink-limits may cause clouding and longer drying times.

For the prevention of fingerprints it is advisable to use cotton gloves.
